Projects

Microphone Array for Beamforming

Started January 2026

- I'm designing a rectangular Microphone Array that will be able to locate audio sources through Beamforming. Later on in the development process I will integrate Machine Learning to identify the nature of the audio sources.

Toy car that demonstrates how the Venturi Effect creates greater downforce on cars

Jan. 2025 - Mar. 2025

- I developed a toy car in Autodesk Inventor and Autodesk CFD, where the underside was designed to generate the Venturi Effect. The underside of the car was shaped in a way that increases the velocity of the air traveling beneath it.
